## **DETAILED ACTION**

### **CLAIM CANCELLATIONS**

The cancellation of claims 3 and 17 have been made of record.

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 5-11 ,15, 16, 26, 29-37, 41-45 directed to the non-elected species no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Change the dependency of claim 5 from "claim 3" to -- claim 1 --.
- Change the status of claims 5-11 ,15, 16, 26, 29-37, 41-45 from "Withdrawn" to - - Original - -.
- Cancel claims 46-52.

### **REASONS FOR ALLOWANCE**

-- The allowed claims are 1-45 and 53.

The following is an examiner's statement of reasons for allowance:

-- The following is a statement of reasons for the indication of allowable subject matter for the listed claims:

Claim 1: The prior art does not show electrical energizing means and communication means located within the primary track, partition connecting means positioned along the track for removably and vertically supporting the partitions, the partition connecting means and the electrical connection means are coupled to the track and to the vertically disposed partitions and electrically energized devices respectively, the electrical energizing means and the communication means are integral with the primary track and physically and electrically isolated from one another.

This in combination with all the other elements pertaining to each of the above mentioned claims are reasons for allowable subject matter and the examiner knows of no permissible motivation to combine the prior art such that the subject matter as a whole would have been obvious at the time the invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
